

Over twenty years ago, in 2000, the Animal Dental Training Center (ADTC) became the world's first permanent and dedicated private facility for continuing education in veterinary dentistry and oral surgery for veterinarians and technicians alike. Today, the center has held more than 400 classes and hosted 5000 participants world-wide, and remains the premier facility for those seeking unparalleled and comprehensive "hands-on" veterinary dental continuing education programs. **All courses are specifically designed for general practitioners and technicians seeking to grow oral surgery & dentistry within their practices.** For those seeking advanced growth, our Master's-Level programs are rigorously crafted to teach the sophisticated skills needed to further specialize in these disciplines and make dentistry a primary clinical focus. Experience the difference that only an immediate practical application, highly individualized teaching, and expert critique can make in your learning and professional growth.

EXPLORE OUR BRAND NEW EAST-COAST TEACHING FACILITY

The all new Animal Dental Training Center located just north of Baltimore, MD features more than 8,000 square feet of world-class clinical meeting space, integrating state-of-the-art technologies and multi-function design in an ultra-modern venue available for medical training, meetings, conferences, and other events. During these uncertain times, we've prioritized the highest levels of safety for all our guests by installing high filtration HVAC systems for heating and cooling. In addition to frequent outdoor air exchanges, these systems feature MERV-13 filters as well as in-duct UVGI (ultraviolet germicidal irradiation) air purification that reduces airborne and surface microbials, bacteria, and viruses. The facility also features touchless lavatory fixtures, sinks, and soap dispensers.

FEATURES & AMENITIES INCLUDE

- 4000 square feet of clinical procedure / lab space
- 50-seat lecture hall
- Individual conference and breakout rooms
- Fully integrated audiovisual equipment and remote conferencing ability in all meeting rooms
- Warm & modern dining room with full on-site catering and outside garden seating
- Custom designed dental wet tables featuring:
 - » Individual high+low speed dental consoles configurable for both right / left-handed operators
 - » Built-in Piezo scalers and electrosurgical units
 - » High intensity individual LED lighting
 - » Electronic lift for ergonomic height adjustment
- Easy travel to/from Baltimore-Washington International (BWI) airport and nearby world-class destination amenities and dining in Baltimore's historic Inner Harbor
- Newly renovated hotel accommodation directly across the street (1-min walk) featuring special room pricing for participants including full breakfast daily.

3-Day / 24-hour RACE CE. Successfully perform vital pulpectomies, surgical root canals, learn prep & obturation techniques using latest restorative materials.

JUNE 2-4, 2023 - Fundamentals of Dentistry

THE ADTC LEARNING ADVANTAGE

- STATE-OF-THE-ART FACILITIES:** up to fifty (50) individual high / low speed workstations, four (4) digital radiography stations, and advanced AV capabilities throughout the facility. Spend more time engaged in learning instead of searching and sharing instruments or waiting to use the equipment.
- HIGHLY PERSONALIZED TRAINING:** Students work at their own pace at individual workstations using their own set of instruments. The low teacher-to-student ratio ensures participants receive the highly personalized attention they deserve while addressing all specific questions and needs.
- EXPERT LEVEL INSTRUCTION:** All faculty members of the ADTC are Diplomates of the American Veterinary Dental College (AVDC) or are in the credentialing process for board certification of the AVDC. They are selected not only for their technical merits, but their dedication to teaching and enthusiastically imparting knowledge to students.
- EXPERIENTIAL EDUCATION:** Intensive hands-on learning sessions and professional critique are just the start! Feel the energy that success brings as you personally connect with veterinary professionals from around the country (even world!) in a small cohort setting. Walk away with newfound skills that are immediately applicable in your everyday practice.
- FULLY OUT-OF-THE-BOX LEARNING:** Complete wet-lab materials, necessary instruments & equipment, and all course handouts are provided on-site everyday. Participants earn Continuing Education credits from the State of Maryland, and for most courses, RACE accreditation. Each course also includes daily breakfast / lunch / coffee / snacks in our spacious café lounge.
- A COMPREHENSIVE EXPERIENCE:** The ADTC provides an "open forum" for discussion amongst both national and international participants about topics ranging from animal dentistry to practice management and marketing strategies. The information gained is both practical and can be easily implemented. The relaxed atmosphere is conducive to learning or simply renewing one's passion for veterinary medicine.
